

## Software Engineering Project NU-NEWS AND UPDATES

### **Purpose and motivation:**

The purpose of this project is to build a dynamic web content management system to manage monthly news in university (nu-newsletter) which will ease the news management team. It will also have updates from Centre of Industry Collaboration, NIIT UNIVERSITY, updates on books from Library and Resource Centre, contact numbers of all faculty members and other staffs. There will be recent mess menu and other useful information will be integrated depending on feasibility.

### **Requirements:**

Software:

1. Apache
2. HTML,CSS,Js and PHP
3. MySQL
4. phpMyAdmin
5. XAMPP
6. Visual Studio Code
7. WordPress

Hardware:

1. A computer system
2. A Server for hosting.
